

DATA CENTERS & DIGITAL INFRASTRUCTURE

Tailored insurance & risk solutions for a sector that never stands still

Behind every connected community and growing business is an infrastructure that's always working. Data centers sit at the core of how the modern world operates — storing, processing, and delivering information across the globe. But the risk landscape behind that flow is highly complex.

Lockton's **Data Centers & Digital Infrastructure Practice** brings clarity and certainty across the full risk ecosystem. Our integrated, consultative advisory connects risk strategy, analytics, engineering insight, and market expertise into a single view of your infrastructure footprint.

THE RESULT

- We help you manage volatility, meet stakeholder requirements, and move with speed and confidence.
- You spend less time navigating risks and more time on what your business was built to do.

KEEP INFORMATION MOVING

What makes Lockton different?

EXPERTISE

From project to portfolio

- End-to-end advisory across the digital infrastructure life cycle
- Specialized expertise at the intersection of risk, capital, and operations
- Counsel that extends beyond placement, delivering continuous insight and support across evolving portfolio needs

INTELLIGENCE

Turning complexity into clarity

- Experience-backed intelligence to simplify complexity and bring clarity to critical decisions
- Connected insights carried from early planning through asset evolution

OUTCOMES

Built for speed, certainty, & scale

- Tailored approach aligned to your assets, operating model, timelines, and growth strategy
- Deploying innovative products where they create clear business value
- Faster execution and greater certainty, enabling confident scaling
