

CYBER & TECHNOLOGY

Cyber threats emerge daily, which can severely impact your balance sheet, your operations, and your reputation. To sustain your resilience against the interconnected digital landscape, you need a partner that can deliver a continuous, adaptive, and clear risk management strategy.

Lockton's three-step approach to cyber risk management

01 INFORM

Our partnership with you begins by deeply understanding your organization, objectives, and operations. Working with you and our data analytics platform, we build a clear picture of the patterns, trends, and threats that shape your unique risk profile. This assessment helps you better understand your threat landscape so you can make more informed cyber risk management decisions.

Your Lockton risk partner will:

- Evaluate and assess your unique cyber and technology threats.
- Quantify the financial impact of your current and emerging risk profile through our data analytics platform.
- Provide you with benchmark and comparison analysis of how your industry peers manage their risks.
- Advise you on the risks you can control and the risks that should be handled by the insurance market.

02 IMPROVE

Armed with a clear picture of the threats you face, our specialist team of cybersecurity consultants takes your risk profile insights and improves your risk controls, risk culture, and risk posture. By embedding better preparedness and risk control strategies in your organization's cybersecurity practices, you can begin to tackle complex cyber and technology threats with confidence.

Your Lockton risk partner will:

- Educate your employees, leadership, and boards on good cyber hygiene and best practices to build resilience.
- Help you with the necessary risk control mechanisms to prevent, detect, and mitigate threats and attacks.
- Deliver gap analysis and scenario testing to help you develop or revise existing incident response and business continuity plans.
- Know and understand when you have compensating controls in place and help tell underwriters your story.

03 INSURE

Harnessing the knowledge from the previous two steps, you will receive a customized insurance strategy to your exact needs, helping protect you from potential gaps and exposures unique to your business. Our approach to helping you manage and transfer your risk means your insurance program and risk controls will continue to adapt as your business evolves and grows.

Your Lockton risk partner will:

- Be on your side and by your side throughout the entire claims process.
- Find the right insurer partner for you and negotiate the best possible terms.
- Connect you to the wider Lockton network to access insurance coverage for all your risk needs.
- Use our extensive claims experience to ensure your policy language is consistently improved to reflect changes in the business, industry trends, and other factors.

Our commitment to you

Unwavering client focus

Here’s what matters most: you. Since 1966, we’ve remained independent — and for good reason. This commitment to independence frees us from external interests and allows us to always create a partnership where every interaction, decision, and solution is focused only on your cyber risk needs.

Global team with local expertise

Cyber threats are global and interconnected. So when it comes to your insurance program, you need a partner that can expertly navigate this landscape. With a global network of more than 120 Cyber & Technology Associates, your dedicated Lockton Risk Advisor will deliver you solutions that adapt to both local and global threats.

Innovation & diversity

Our commitment to diverse talent and perspectives means you will get something you may not be used to with insurance — customized and creative solutions. Our team is always empowered to push boundaries, bring you fresh ideas, and innovatively solve problems to improve your cybersecurity resilience.

360-degree approach to your risk management

The very best cyber risk management strategies are much more than an insurance policy. That’s why we take a broader approach to protecting your business. By integrating data analytics, risk consulting, and claims advocacy, you get a holistic cyber risk management program.

TOGETHER, LET’S OVERCOME YOUR CYBER RISK CHALLENGES.
