

SAGE™ is a revolutionary new way to look at risk

Lockton Re's proprietary software platform lets you visualize, design, and modify different structures—to help optimize your risk profile.

See the risk impacts to different structures in real time.

01.

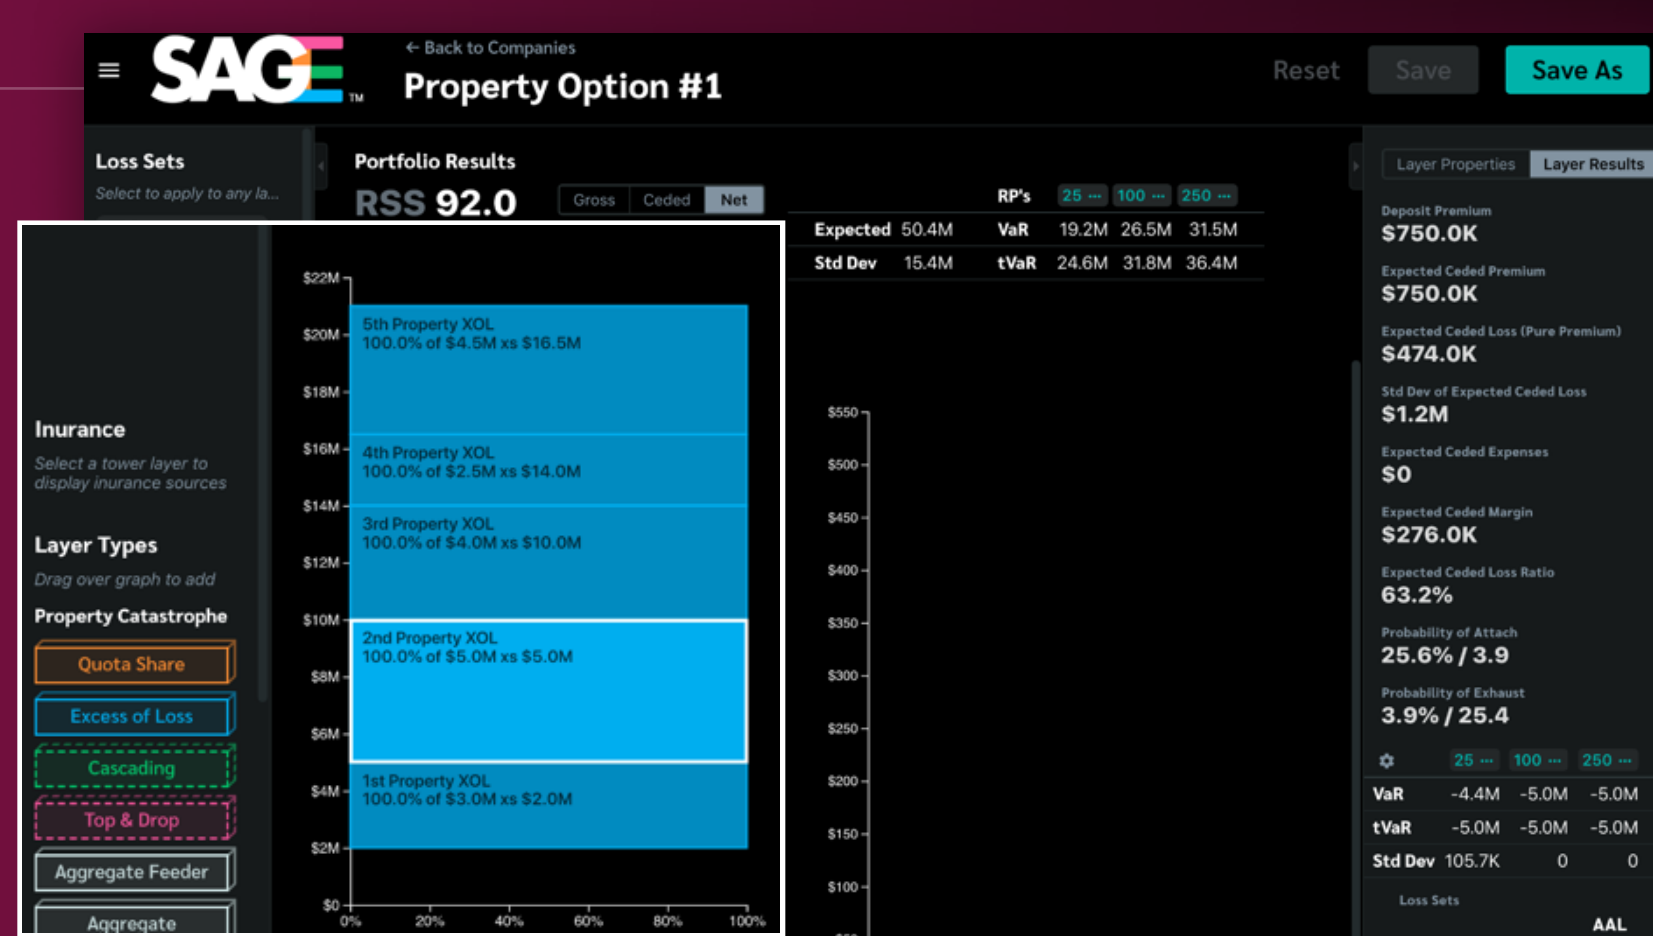

Select Parameters

Choose reinsurers, select programs, and weight the risk transfer metrics that are most important to you.

02.

Design Structures

Our interactive, drag-and-drop interface allows you to model structures and view associated financials in real time.

03.

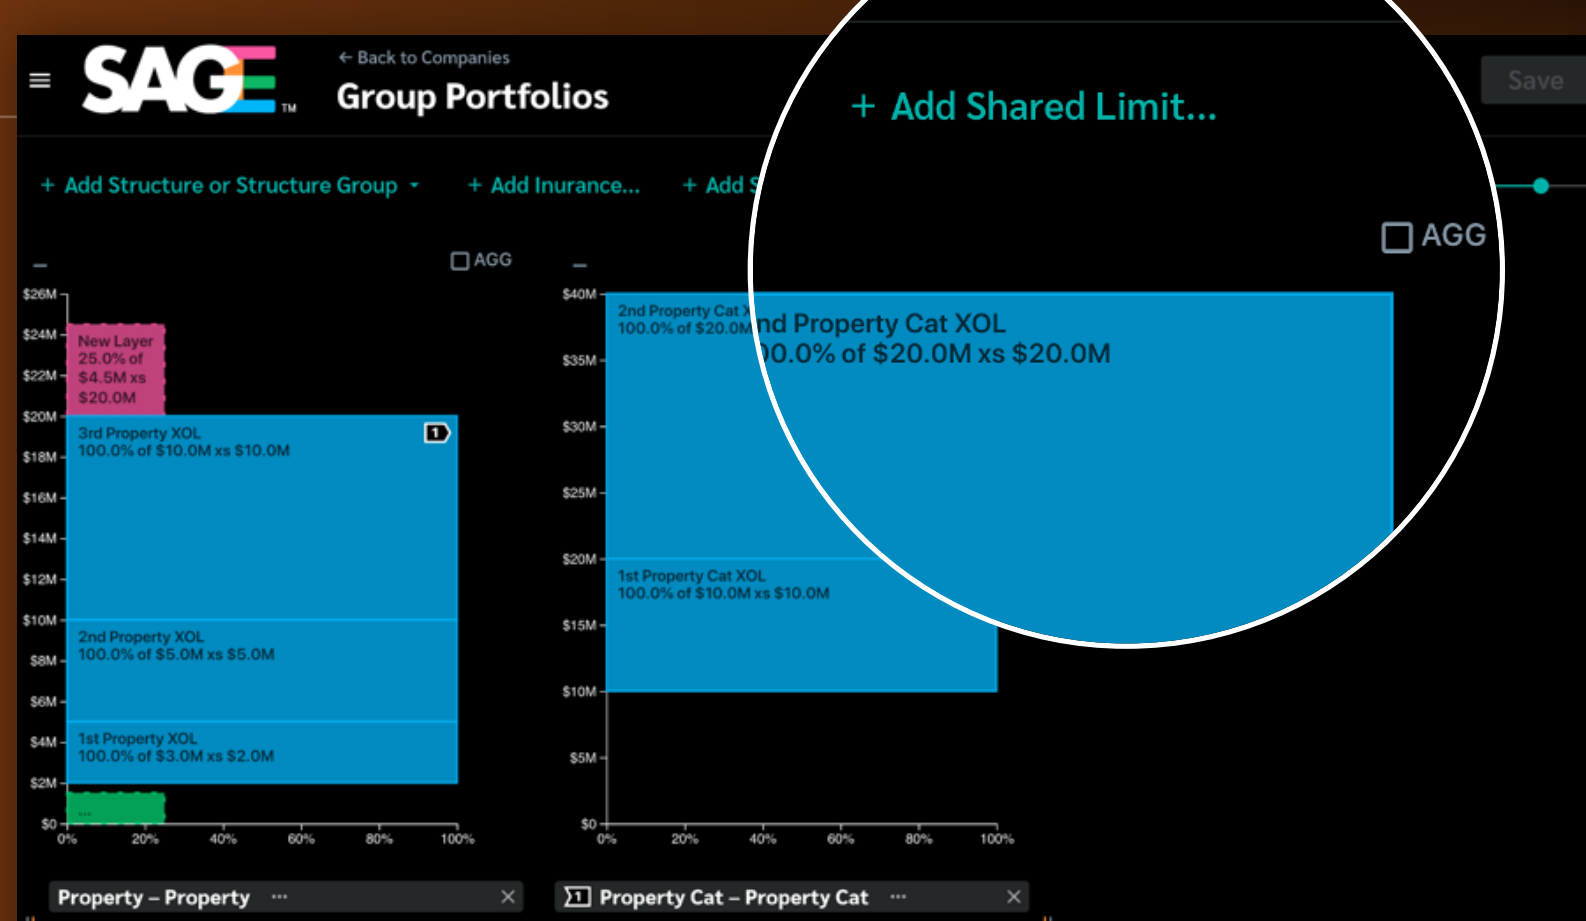

Compare Options

SAGE dynamically ranks different structuring options based on your priorities so you can easily compare options.

04.

Stay Organized

Group together different business lines, define insurance and shared limit relationships—and access everything in one centralized place.

It's a monumental leap forward for reinsurance

Complete Transparency

See all possible reinsurance structures and the impacts to underlying financials.

Intuitive Interface

Simply add, move, and resize layers using an intuitive, drag-and-drop interface.

Real time Modeling

Change program structures and see new portfolio metrics in real time.

Easier Access

View and modify treaties and structures across business lines in one centralized location.

Greater Choice

See more comprehensive options with greater insight into underlying components.

Better Collaboration

Instantly share information internally and with your Lockton Re team for easier management.
